

FROM THE DESK OF GARY BOSHART PRESIDENT

The first quarter of the year ended on a very positive note. Sales were quite strong and we believe the economic picture will continue to improve throughout 2010.

Our U.S. Sales Meeting has been rescheduled to September 2010 at our Head Office location. We look forward to meeting with our Reps at that time.

In the months ahead Boshart Industries will be introducing some new and innovative products to the market. Watch for these announcements in the upcoming weeks.

MEET	Moncton Coliseum Moncton, NB		May 5-6
Canwell West	Winnipeg Convention Centre Winnipeg, MB		May 26-29

INJECTION MOULDING UPDATE

Boshart Industries Injection Moulding Department is equipped with a 500 ton Nissei, 400 ton Engel, a 80 ton Engel with a robot, and more recently purchased in January 2010 was a 28 ton Engel allowing us to run small parts, and a state-of-the-art 240 ton Engel equipped with a sprue picker which currently runs without added manpower.

The addition of the 28 ton Engel and 240 ton Engel would not have been possible without the expansion of our injection moulding building in 2002 to a total of 14,000 sq. feet. This has provided us with the versatility to manufacture captive and custom designed products for a variety of different industries. To meet the demands in the marketplace, our staff work around the clock, five days a week.

BOSHART BIRTHDAYS

Happy Birthday to
the following Boshart
employees:

May

Sharon Arndt
Dan Fenton
Mary Koehler
Ray Williams
Barb Chalmers
Chris Zehr
Kevin Hamilton
Randy Kelsey

June

Roman Albrecht
Winne McCutchen
Catherine Roes

GETTING TO KNOW.....

Steve Hudson, Draftsman

I started at Boshart Industries Inc in August of 2003. I spent my first 2 years in the Injection Moulding Department on the night shift where I learned many aspects about injection moulding. The knowledge that I gained from that department helped me when I started my current job as a Draftsman in the Research and Development department. I currently work directly with the Product Manager to develop new product as well as changing existing product. I also work directly with mould makers and part makers to get pricing, do pricing analysis, and check samples before production runs are done.

I live with my wonderful wife (Sharon) and our 2 children (Cory 19 and Natasha 15) about 10 minutes from BII where we own a 1-1/2 acre country property which we enjoy very much. We spend most of our holiday time in Northern Ontario where we enjoy renting cottages and exploring different areas.

I have enjoyed my time and the people here at BII and look forward to the future.
