“Louisiana ACT 362, House Bill 471” The Reduction of Lead in Drinking Water

In June 2011, Louisiana passed a No-Lead law HB471 which is consistent with California AB1953, Louisiana & California laws require third party certification by an ANSI accredited laboratory. - Link to Act 362

http://la.opengovernment.org/system/bill_documents/001/214/396/original/streamdocument.asp?1310025943

This new Louisiana law comes into effect January 2013, one year prior to the Federal law that Congress signed into law on January 4, 2011, an amendment to the Safe Drinking Water Act through Bill S.3874 (The Reduction of Lead in Drinking Water Act) amends Section 1417 of the Safe Drinking Water Act by redefining “lead free” and is effective January 4, 2014. The federal law will prohibit manufacturers and importers from selling plumbing fixtures that do not meet the new standards on a Nation wide basis. The amendment will make the Federal Law consistent with California's AB1953, Vermont's Act 193, Maryland's HB372 and Louisiana's Act 362 (HB471). It will now limit the maximum content of lead in plumbing devices to a Weighted Avg. Lead Content of 0.25% or less.
